Acceptance Testing
UAT Execution & Report Submission

Date	08 October 2026
Team ID	SWTID-2026-2540
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	4 Marks

1. Purpose of Document

The purpose of this document is to summarize the User Acceptance Testing (UAT) coverage, test execution results, and known defect status for the Script-Controlled ACL project at the time of release for UAT. The project demonstrates record-level access control in ServiceNow using roles, a Branch condition, and script-controlled ACLs.

2. Defect Analysis

No defects are recorded in the supplied project test evidence. All six documented functional test cases are marked Pass. Therefore, the defect-resolution summary below records zero known defects for the supplied UAT evidence.

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	0	0	0	0	0
Duplicate	0	0	0	0	0
External	0	0	0	0	0
Fixed	0	0	0	0	0
Not Reproduced	0	0	0	0	0
Skipped	0	0	0	0	0
Won't Fix	0	0	0	0	0
Totals	0	0	0	0	0

3. Test Case Analysis

The project evidence contains six functional UAT cases covering Read, Create, Write and Delete permissions, administrator access, and unauthorized access. All documented cases passed.

Section	Total Cases	Not Tested	Fail	Pass
User & Role Management	2	0	0	2
Institution Details / Records	1	0	0	1
Security / Read ACL	1	0	0	1
Create / Write / Delete ACLs	2	0	0	2

4. UAT Test Execution Summary

Test ID	User / Roles	Test Action	Expected Result	Status
TC-01	EEE User with bb1	Open protected table	EEE branch records visible	Pass
TC-02	User without bb1	Open protected table	Protected records not visible	Pass
TC-03	Administrator	Open Institution Details	All branch records visible	Pass
TC-04	bb1 + bb2	Open protected table	New button available; can create	Pass
TC-05	bb1 + bb2 + bb3	Open EEE record	Can view and edit; New available	Pass
TC-06	bb1 + bb2 + bb3 + bb4	Use record actions	Can view, create, edit and delete EEE records	Pass

5. UAT Acceptance Criteria

ID	Area	Acceptance Criteria	Result
AC-01	Read access	EEE user with bb1 can access permitted EEE records.	Pass
AC-02	Unauthorized access	User without bb1 cannot access protected records.	Pass
AC-03	Administrator access	Administrator can access records across branches.	Pass
AC-04	Create access	bb1 + bb2 user can create a permitted record.	Pass
AC-05	Write access	bb1 + bb2 + bb3 user can edit permitted EEE records.	Pass
AC-06	Delete access	User with all four roles can delete permitted EEE records.	Pass

6. Open Issues / Exceptions

No open issues or exceptions are identified in the supplied UAT evidence. The source project report records all six functional test cases as Pass. Quantitative performance metrics such as response time, load capacity, or request rate are not specified in the supplied project materials.

7. UAT Evidence to Attach

Evidence	Area	Screenshot to Attach
Evidence 1	User creation	Screenshot of the EEE User record in ServiceNow User Administration.
Evidence 2	Custom roles	Screenshot showing bb1, bb2, bb3 and bb4 roles.
Evidence 3	Institution table	Screenshot of u_institution_details table and fields.
Evidence 4	Student records	Screenshot showing EEE, ECE and CSE records.
Evidence 5	Read ACL	Screenshot of Read ACL with bb1, Branch = EEE,

		Advanced option and script.
Evidence 6	EEE verification	Screenshot showing EEE User's permitted records.
Evidence 7	Administrator verification	Screenshot showing administrator full access.
Evidence 8	Create / Write / Delete	Screenshots showing bb2, bb3 and bb4 ACL configurations and resulting actions.

8. UAT Result

Based on the supplied test evidence, the Script-Controlled ACL project meets the documented functional acceptance criteria. All six recorded UAT test cases are marked Pass, with no documented defects or open exceptions in the supplied report.

9. UAT Sign-off
